New excitement for a New Year

Educators are delighted this New Year as they witness the Pitsco line of learning tools found in their Christmas stockings. The **Pitsco STEM** offerings include the two building systems of **TETRIX[®] PRIME** for ages 12 and up and **TETRIX MAX** for ages 14 and up. After you construct the TETRIX robots, the new **TETRIX PRIZM[™] Robotics Controller** is available to make your creations come to life.

The excitement continues with the new **Missions**, a **STREAM** program for elementary school students, and **Pitsco's K-12 Maker Space[™]** products.

As budgets are constructed, a knowing eye should also take a look at **STEM Expeditions[®]**, if funds are available. And if not, perhaps one of the following grant sources might be of assistance.

Grantor/Grant	Federal/Private	Category	Academic Subjects	Deadline	Amount	Special Focus	Areas	Pitsco Solutions
Abell Foundation	Private	Pre-K-12	Varies	January 5, March 1, May 1, August 1, October 9	Varies	At Risk, Career and College Readiness, Professional Development, Underserved Populations	Baltimore City, MD	Missions , STEM Expeditions
