Keep on being a success

Irving Berlin said, “The toughest thing about success is that you’ve got to keep on being a success.” We find success in education when we identify objectives and focus or bend our efforts to those overriding considerations. The percentage of gross national product spent on education has grown and will continue to escalate because of the complicated world we inhabit. New science and technology attendant with perceived needs is the hallmark of the education world today. **Pitsco Education** has pursued and led while enjoying the strides to make progress toward the science and technology goal line. Pitsco stimulates the sciences in the areas of force and motion with the **Heat Expansion Gauge**, a tool for physics that measures metal expansion, and the **Steam Engine Kit** that enables students to build a working steam engine. Solar energy may be explored with **Pitsco’s Solar Oven Kit** or **Solar Oven Pack** that demonstrate heat gain, heat loss, and thermodynamics. This curriculum is exemplary when students’ interest in math is low or they struggle to understand story problems. The path to educational success requires the ability to acquire funds with which to purchase these great solutions, so here are a few avenues you might traverse toward that end.

Gladys Brooks Foundation

The purpose of the foundation is to provide for the intellectual, moral, and physical welfare of the people of this country by establishing and supporting nonprofit libraries, educational institutions, hospitals, and clinics.
