

Grant Funding Leads

Financing educational destinies

In the words of Franklin Roosevelt, the coming generations have “a rendezvous with destiny.” And Pitsco has aided that educational destiny with an array of learning tools to pique the interests of numerous teachers and students.

Through creative and exciting products and curriculum such as Pitsco Makerspace Packages, the *Extreme Earth Mission*, and TETRIX® and the new TETRIX PRIZM™ Robotics Controller, Pitsco continues to be a leader on the trek toward the educational rendezvous. The stroll to that goal might be fraught with economic bumps, so the following sources could aide in traversing that path:

Grantor/Grant	Federal/Private	Category	Academic Subjects	Deadline	Amount	Special Focus	Areas	Related Pitsco Solutions
